

Prins AV

Stefan Prins

As the founder and lead technician of my own audio-visual installation company, I have over 15 years of experience delivering high-quality AV solutions for both private and commercial clients. My work encompasses the full project cycle from consultation to installation, testing, and support.

I work closely with my clients to find the best solutions to their specific needs, ensuring functionality and user-friendly operation. In addition to AV installations, I have extensive experience in live sound and event production, supporting music festivals and bands.

SERVICES

• AV INSTLLATIONS

Specialized in delivering tailored audio-visual installation solutions that enhance communication, entertainment, and functionality across residential, commercial, and public environments. Executing professional installation multi-room audio/video systems, video conferencing solutions, control systems, projectors, led walls, array systems, and acoustical treatments.

System Design & Consultation:

Collaborating directly with clients, architects, interior designers, and contractors to design AV systems that meet functional needs and design preferences.

Commercial Solutions:

Scalable AV installations for retail environments, restaurants, hospitality and cultural venues.

Structured Cabling:

Data infrastructures including CAT cabling, rack systems, network switches, and routers.

Troubleshooting & Support:

Providing comprehensive system testing, user training, ongoing maintenance.

• LIVE SOUND & LIGHTING

Specialized in providing reliable technical support for live music events and performances, covering both sound and lighting. From setting up PA systems and mixing live audio to designing and operating dynamic lighting setups, ensuring every performance looks and sounds its best.

Sound Engineer for Live Events, Festivals & Bands:

Full-scale setup and operation of professional live sound reinforcement systems, stage monitors, and digital mixing consoles for multi-act lineups.

Theatrical & Architectural Lighting Setup:

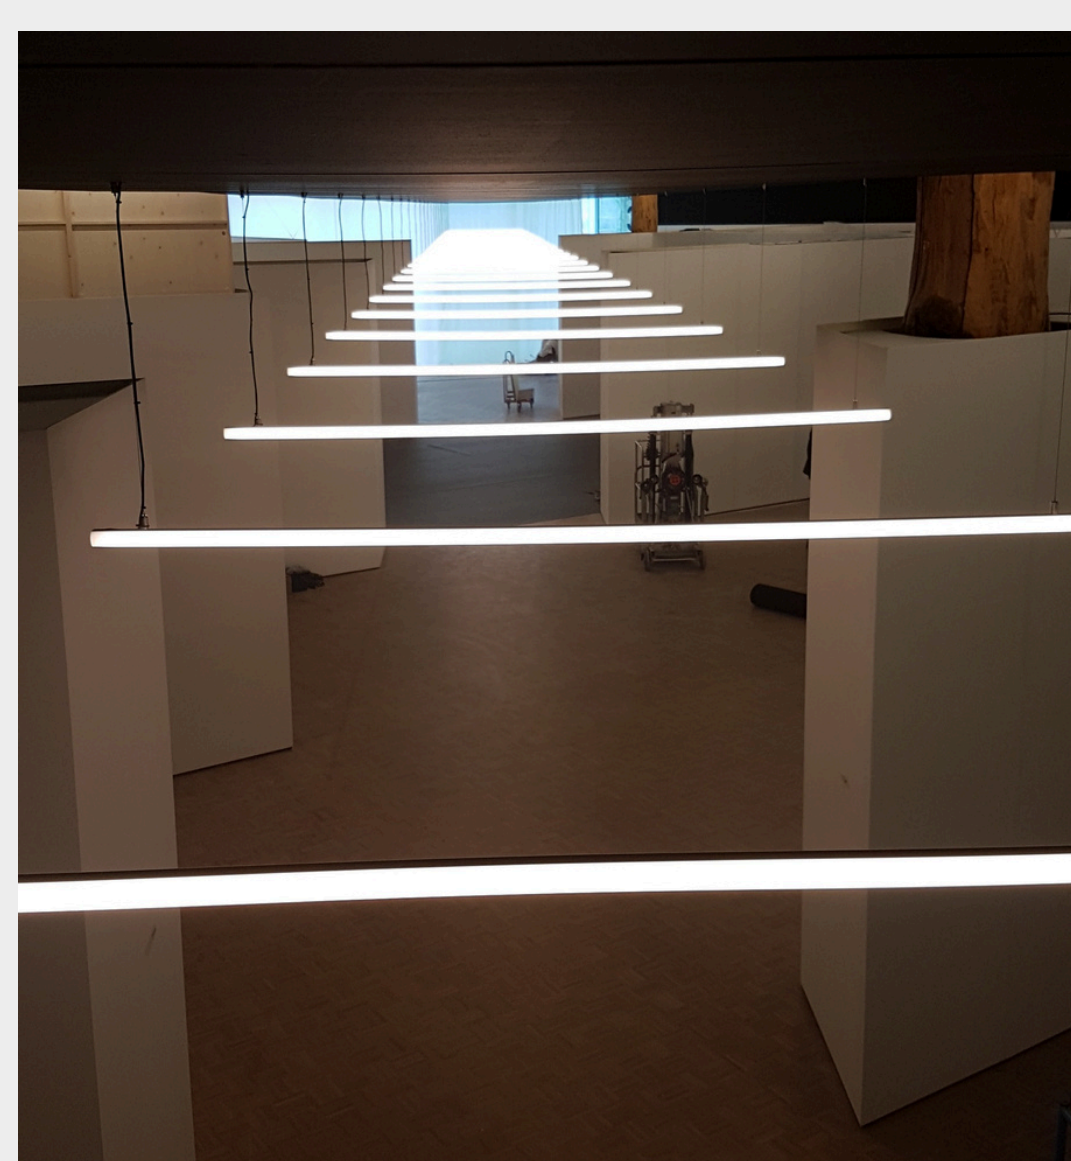

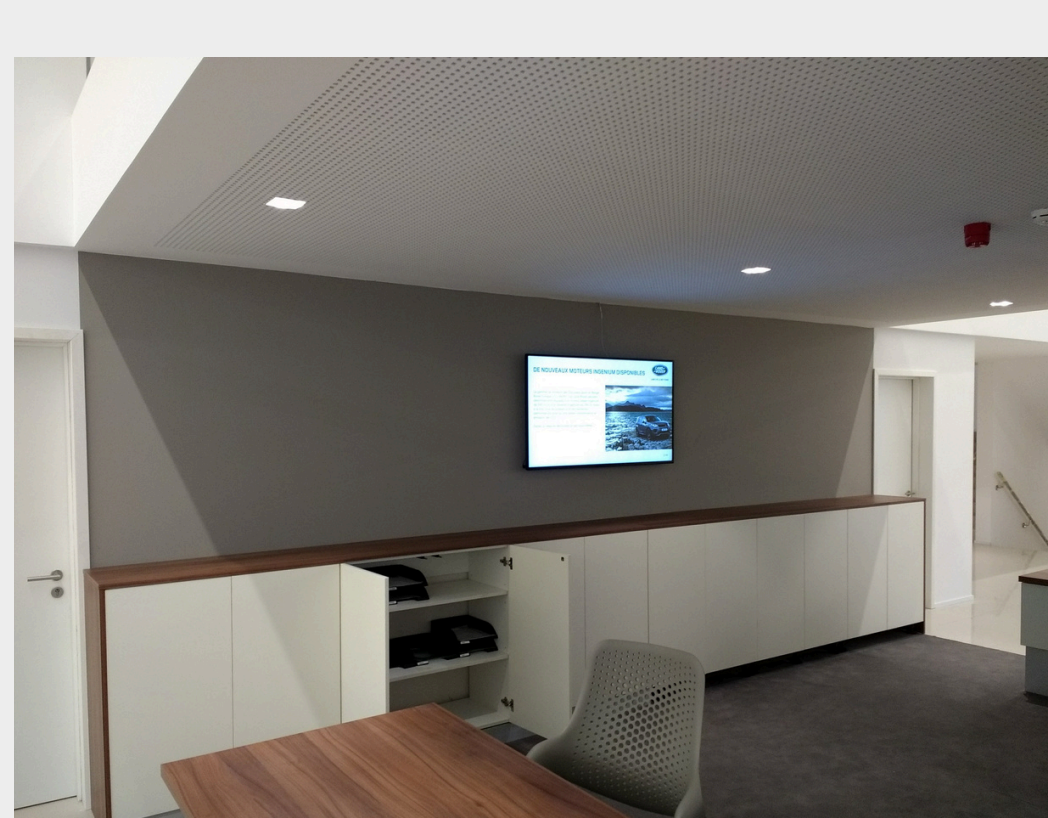

Designing, installing, and configuring theatrical and architectural lighting systems to enhance stage performances, events, and interior environments.
